To Whom It May Concern:

Kasar Canada Limited worked with Erb Group of Companies to assist with the development and implementation of our CTA, Trucking Food Safety Program at our distribution facility in Baden, ON as well as our refrigerated trucking fleet.

Kasar started the Pilot Program with our in-house HACCP team to train our team members in the CTA program, which included the required HACCP Prerequisite Programs, GDPs, HACCP Plans and all supporting documents, record keeping requirements, verification and validation procedures as contained in the CTA, TFSP reference manuals and supporting documents. Kasar staff is very knowledgeable and their willingness to help has been and continues to be very much appreciated. They present themselves in a concise and courteous, as well as they have the ability to solve problems.

The program was completed in a timely manner. Also implementation of the program has been extremely helpful from Sales & Marketing perspective as well as helping reinforce our policy on food safety.

We found Kasar Canada Limited quality of work, timeliness, and competency with the program to be excellent. Information was always exchanged in a timely and clear manner, privacy and confidentiality of Erb's materials and operations was always maintained, and all internal Erb Group policies and procedures adhered to.

Erb Group of Companies would highly recommend Kasar Canada Limited to other companies.

Yours truly,
