Re: Food Safety Program

Fernbrook Springs Bottled Water Company Ltd. utilized the services of Kasar Canada Limited to develop and implement a Food Safety Plan for our bottling facility in Halton Hills Ontario. This program began on site with our HACCP Team and continued with follow up visits and remote location assistance.

This program was developed with respect to the CBWA requirements including the HACCP Prerequisite Programs, GMP's, HACCP Plans. It enveloped all required supporting documents, record keeping, verification and validation procedures as per the CBWA, reference manuals and supporting documents. Kasar has been simply business like and diligent in bringing this program to life. There is an evident vast knowledge of food safety which was readily shared throughout this project. The ability of Kasar to present the information in a clear, concise and courteous manner was appreciated and beneficial to Fernbrook Springs.

This program was completed in both timely and cost effective methods and will be a helpful marketing tool for our company. The combined abilities of the Kasar team, the quality of their work, meeting timelines and the confidential manner they displayed has proven to be a successful recipe for Fernbrook's food safety program. It has been both a joy and pleasure to work with Kasar Canada Ltd. We look forward to furthering our relationship in the future.

Fernbrook Springs would highly recommend Kasar Canada Ltd. to any company seeking to develop and implement a food safety program.

Sincerely,

Rob MacKay
Quality Assurance Manager – Fernbrook Springs
